

I believe it is in the best interests of the "State of Connecticut" and its citizenry to SUPPORT this bill. This addresses the right of self defense thru the use of non lethal electronic defense weapons. The laws of Connecticut should uphold the Second Amendment, and the United States Supreme Courts rulings, and not be contradictory to it.

If the fundamental right of self-defense does not include stun guns, then the safety of Connecticut residents is left to the mercy of state legislators that may be more concerned about disarming the people than keeping them safe.
